STATIONARY ENGINEERS EDUCATION AND APPRENTICESHIP FUND

BUILDING AUTOMATION

Prerequisite: Basic Computer Skills (no former training or other computer classes required)

This is a review of how the equipment used in modern heating plants, power plants, air conditioning plants and other ventilation systems can operate with maximum efficiency by the use of automated computer controls. This course will cover the systems used to automate routine operations of the plant, as well as access control systems, security systems and voice-data-video-systems.

START DATE: March 9, 2012
DURATION: Eleven Weeks
DAY: Friday
TIME: 5PM – 9PM

Registration: February 6 – 17, 2012
(\$25.00 late fee after February 17)
